Digital Co-creation

# Digital Waves in ICT

**1<sup>st</sup> Wave**

**The Internet**  
Connected, online

**Online consumer business**

**2<sup>nd</sup> Wave**

**The Mobile Internet**  
Real-time, anywhere

**3<sup>rd</sup> Wave**

**The Internet of Things**  
Convergence of physical & digital

**4<sup>th</sup> Wave**

**AI and Robotics**  
Knowledge & automation

**Hyperconnected World**  
A huge impact to every industry

# Digital Transformation at Three Levels

## Digital Project

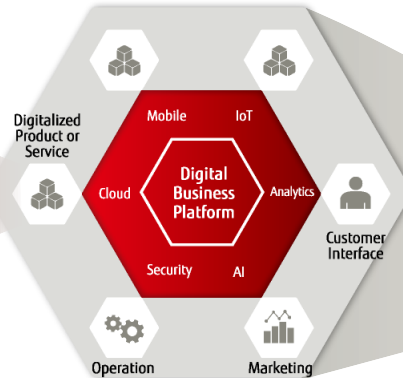

- Apply digital to a function or a product / service

Creation

## Digital Business

- Apply digital to the core of business
- Extend Digital Ecosystem

Platform

## Digital Arena

- Move from an existing industry and work in a new Digital Arena

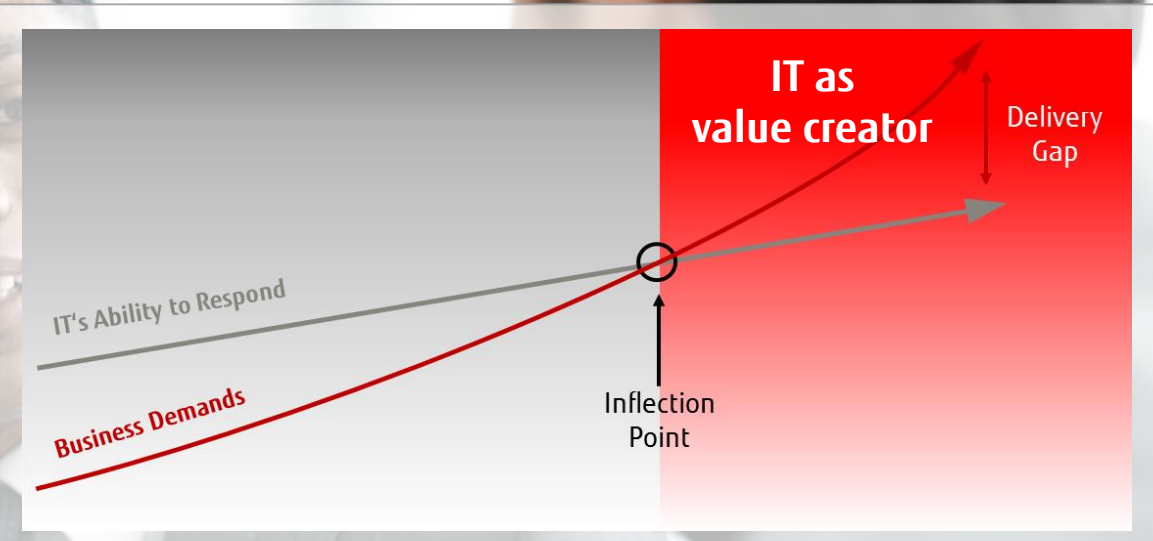

Orchestration

# Heading towards the inflection point

Digital business demands are outpacing IT's ability to deliver at the speed required by the business

IT infrastructure as cost center

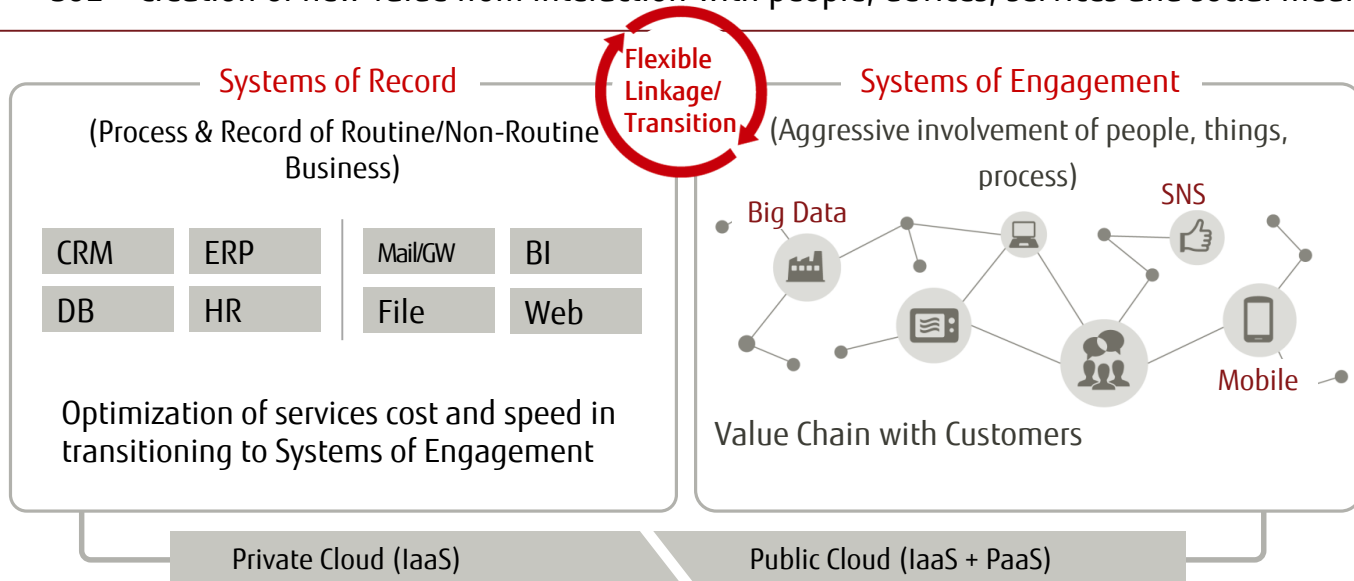

Where do you see yourself today?

# The Need for Hybrid IT

## The Need for Hybrid IT – Systems of Record / Systems of Engagement

- SoR = Integration utilizing knowledge accumulated from development experience as a service
- SoE = Creation of new value from interaction with people, devices, services and social media

# Hybrid IT: The perfect balance

Getting the perfect balance between supporting powerful innovation and robustly managing the associated risks, costs and benefits

# Hybrid IT Benefits

At the core of hybrid IT is **flexibility** and the ability to change the balance over time to mirror any organization's needs.

Hybrid IT balances agility, innovation and doing things better alongside governance, managing risk and cost management.

## Growth

- Hybrid IT supports growth, competitiveness and innovation across industry sectors and globally delivering scalability and enabling pay-as-you-go IT services.

## Risks and costs

- Adopting Hybrid IT you can manage security and cost risks while innovating at pace.

## Productivity

- Users get access to services much faster, while CIOs can deliver the level of operational management control any board expects.

# Hybrid Challenges

## More cloud creates different challenges

Organizations are identifying new challenges as managing multiple clouds alongside traditional systems becomes the reality

New data security, service disruption and regulatory compliance risks emerge

Risk

Unified management

Cloud and non-cloud systems must be managed alongside one another

Business unit leaders say integration issues prevent them getting the best out of departmental clouds

Integration

Cost control

Faster cloud adoption increases need to manage costs transparently

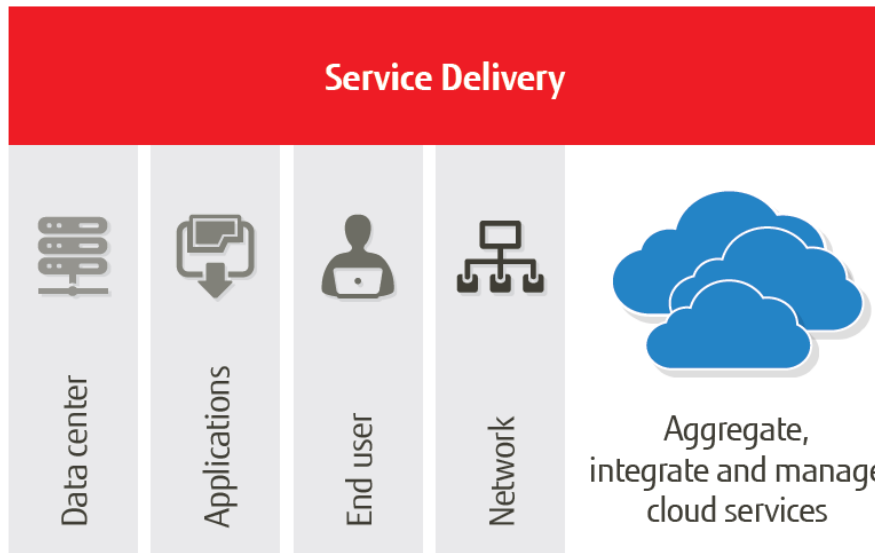

# Managing Hybrid IT Landscape

A new kind of IT environment is rapidly emerging

## Typical service tower model

## New 'hybrid IT' model

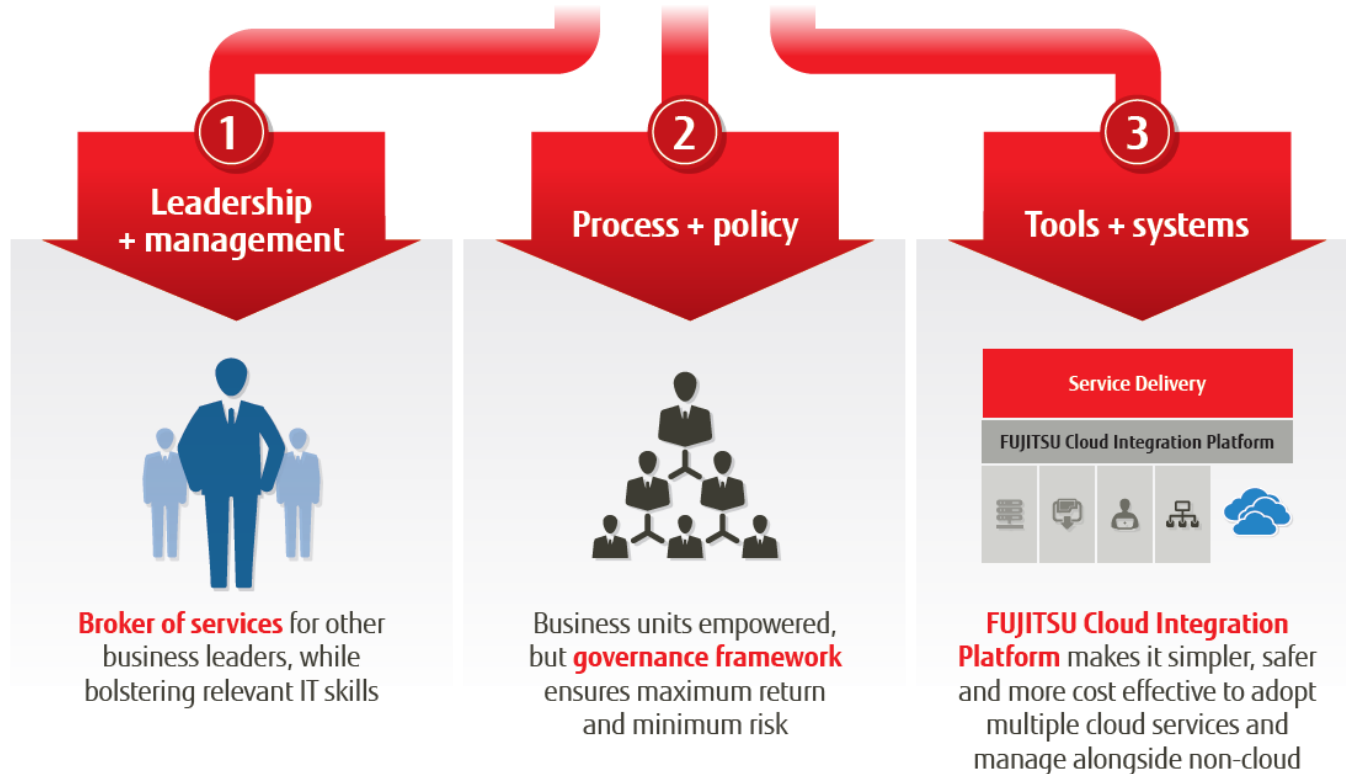

# Managing Hybrid IT Landscape

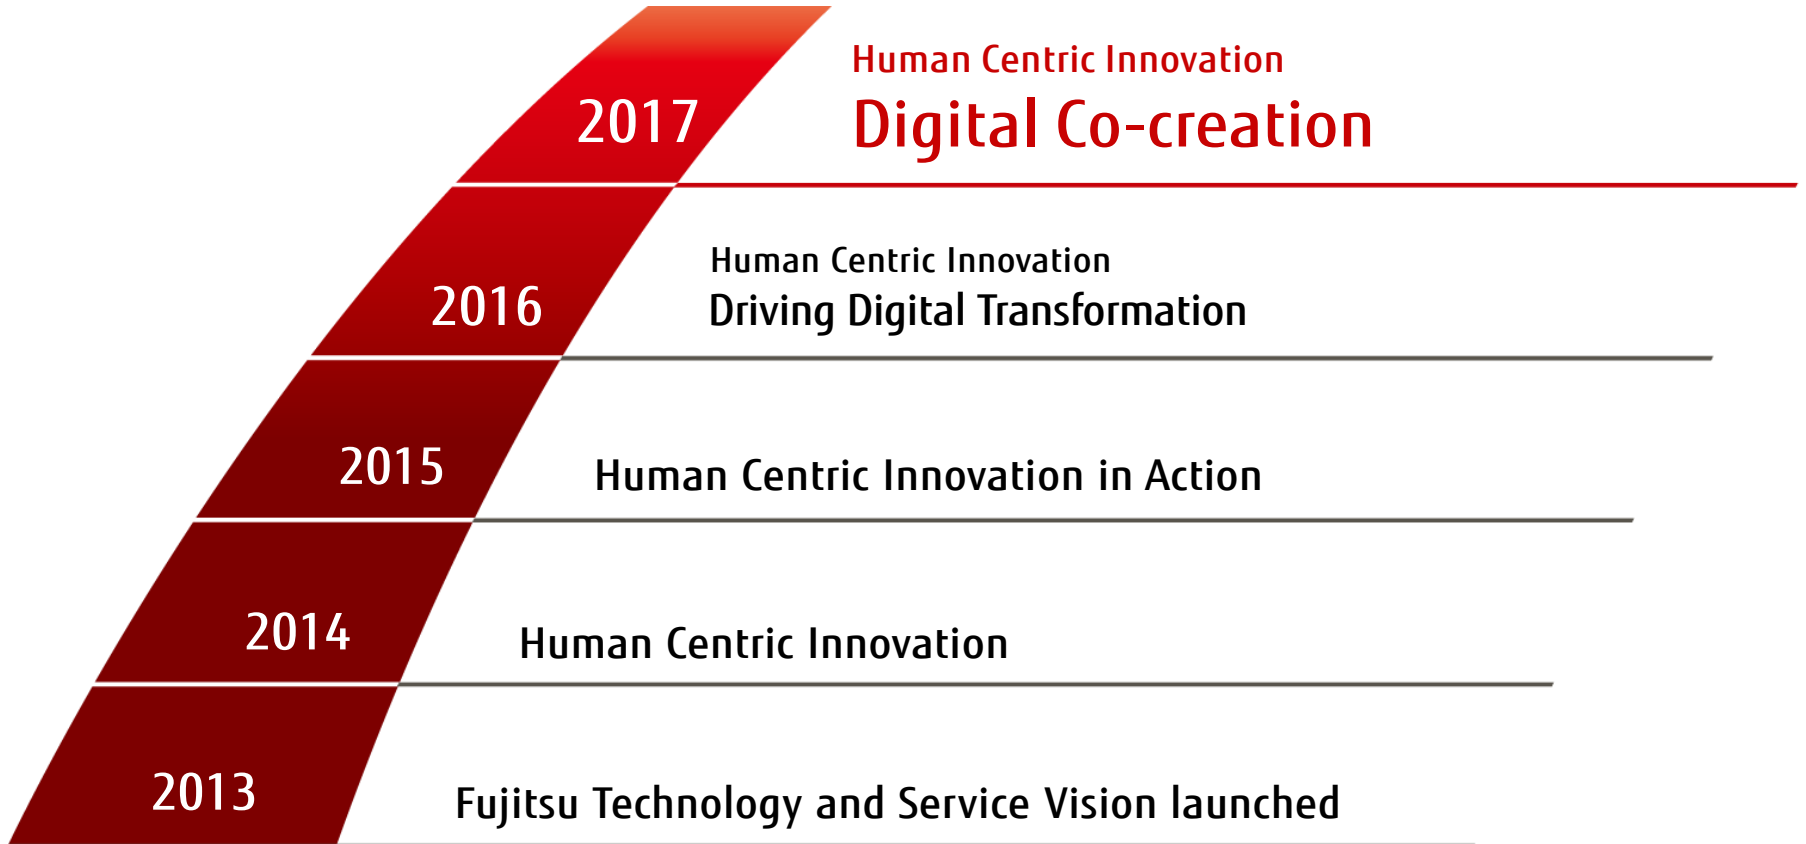

IT must adapt

Governance models, integration processes and management systems must evolve

# Our journey

# Digital Co-creation

- Blending business expertise and digital technology
- Creating new value together with eco system partners and customers to shape a different future

# Human Centric Innovation

## Human Empowerment

-  Better Experience
-  Quality of Life
-  Creative work
-  Decision support
-  Acquisition of knowledge & skill

## Connected Infrastructure

-  Sensors
-  Smart Home
-  Smart Cars
-  Smart Factory
-  Smart Agriculture
-  Smart Healthcare
-  Smart City
-  Robots

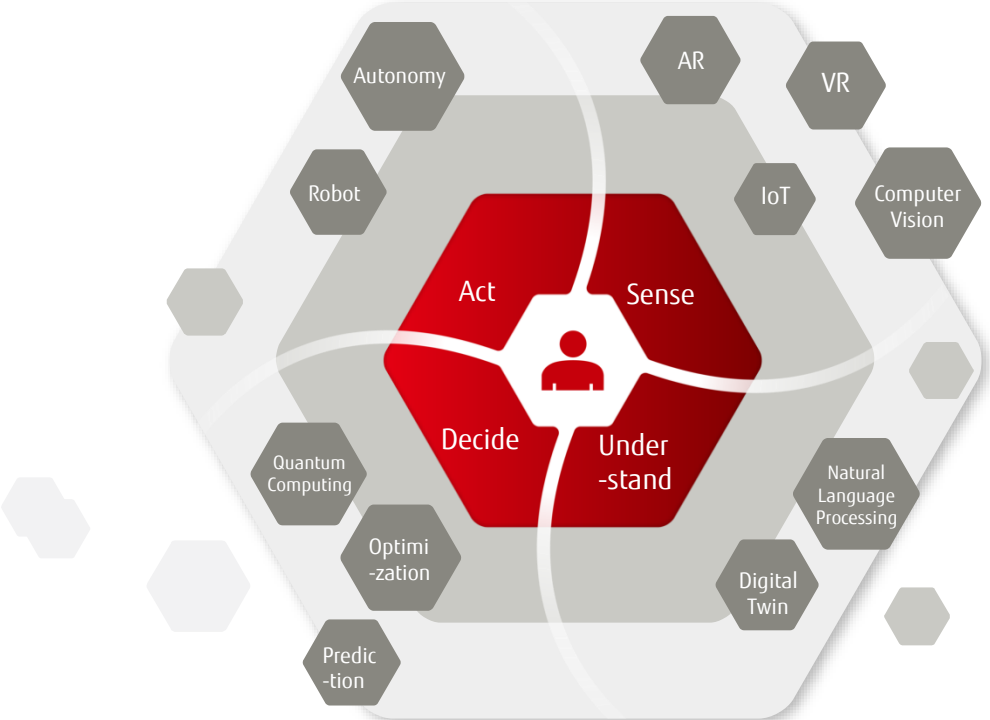

## Creative Intelligence

-  Information from people and things
-  Information from business and society
-  Information Analysis
-  Algorithms
-  Security & Privacy

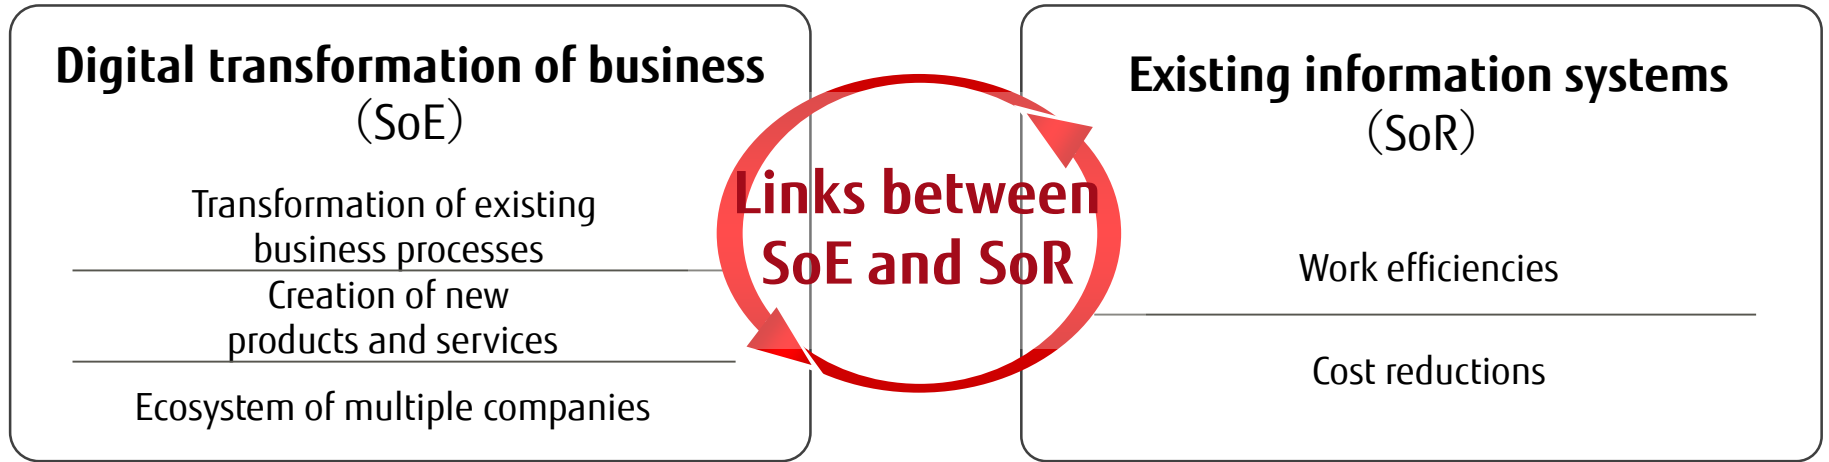

# Digital Technology Potential

The evolution of technology enables the unthinkable breakthrough.

# What is MetaArc?

Digital Business Platform

## Propositions

Hybrid IT

Digital

Business Centric  
Infrastructure

### Multi Cloud Integration, Managed Service

#### Platform Service

Mobility    Big Data    IOT    AI

Cloud  
Service

Private Cloud  
Product

Fujitsu Group Clouds  
Other Clouds

Global WAN

Enabled by

Digital Business Platform MetaArc:

A set of technologies, cloud solutions,  
multi-cloud and hybrid IT management,  
professional and managed services and  
an ecosystem of partners

Combination of "Meta" and "Arc": Meta = Beyond in  
Greek, Arc = Connect

# Mobilizing the enterprise: Market drivers and trends impacting the workplace

The need to **evolve** traditional workplace to support the next Digital revolution

## Technology

- Big Data and Analytics
- Artificial Intelligence
- Automation, Robotics and chat bots
- IOT
- Biometrics
- Hyper-connectivity
- Mobility & Social

Achieving the perfect balance

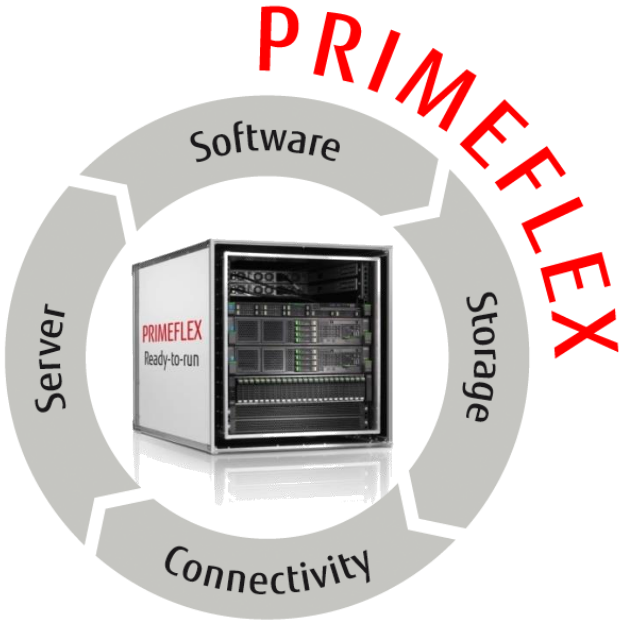

## Market Drivers

- Competitive Advantage
- Cost Reduction
- Agility – “Fail Fast”
- Enhanced Productivity
- Moving Digital to centre stage
- Engaging customers & employees
- Supporting Generational Fusion

# FUJITSU Integrated System PRIMEFLEX

Infrastructure to ensure a Hybrid Transition

- Pre-configured
- Pre-integrated
- Pre-tested

Reduce complexity, time, risk and cost. Increase operational efficiency.

# PRIMEFLEX | Addressing our customers' needs

## General Purpose

### Virtualization

PRIMEFLEX for  
VMware vSAN

PRIMEFLEX for Storage  
Spaces Direct

PRIMEFLEX  
Cluster-in-a-box

PRIMEFLEX vShape  
PRIMEFLEX for VMware Cloud Foundation

### Private Cloud

PRIMEFLEX for  
OpenStack

## Purpose Built

### SAP

PRIMEFLEX for  
SAP Landscapes

PRIMEFLEX for SAP HANA

### Big Data

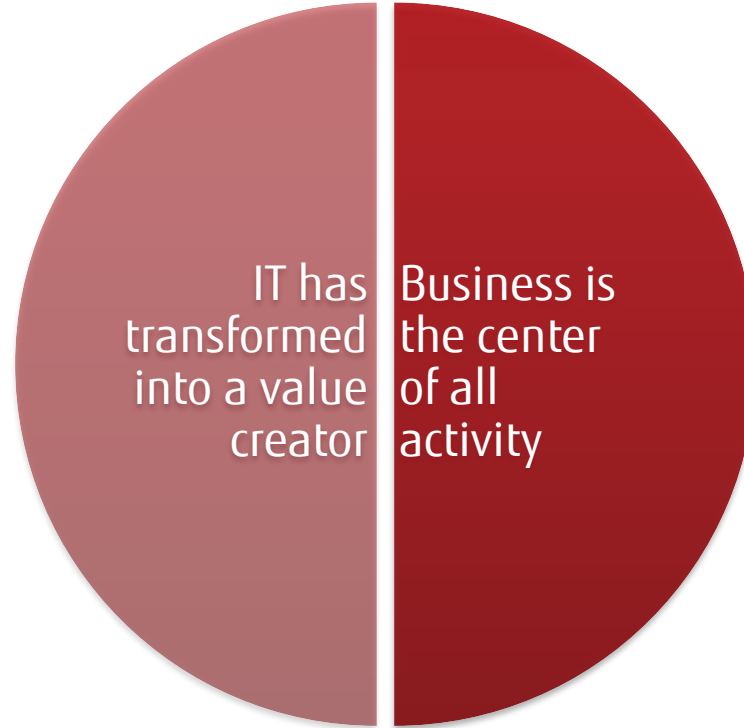

PRIMEFLEX  
for Hadoop

### HPC

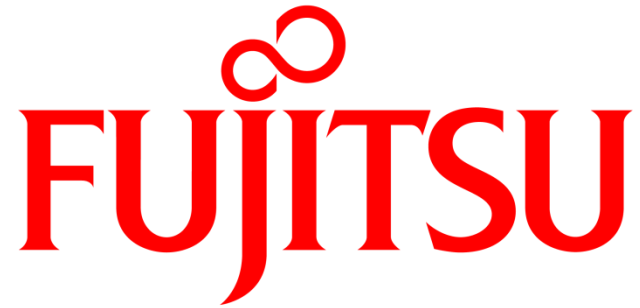

PRIMEFLEX  
for HPC

# The Art of Balance

The logo features a red infinity symbol positioned above the word "FUJITSU". The word "FUJITSU" is rendered in a bold, red, serif typeface. The letter "J" is notably stylized with a long, sweeping tail that extends downwards and to the left.
